Description:

Life skills are essential skills that enables one to effectively deal with everyday challenges of life. Life skills help people protect themselves and promote health by taking positive actions. We live in a dynamic world, in this constantly changing environment, having life skills is an essential part that would enable us to meet the everyday challenges of life. To cope with the increasing pace and change of modern life, students need new life skills such as the ability to deal with stress and frustration.

One of the important life skills is: Yoga. Yoga can help develop skills that helps one navigate through social and emotional challenges of life. By helping students learn regular meditation, intentional breathing, asana practice, they are practicing patience and single-minded focus, which is further improving their physical and emotional awareness and leads to development of resilience.

Yoga teaches the following Life skills:

1. Focus:

It is the ability to direct the flow of consciousness onto something specific. Yoga involves practicing of exercises that cultivates focus. If one develops focus or the ability to give a hundred percent to a task, life would become more efficient.

2. Stillness:

Yoga helps us learn and relish stillness, silence and just being. It helps us to be mindful, that is the state of being fully aware of the present. Mindful practices are important as it helps us regulate our emotions better thereby decreasing anxiety and stress. It also helps focus our attention and observe our thoughts and feelings without any judgements.

3. Stress Management

Yoga significantly reduces stress and anxiety. It relaxes the body and loosens the muscle tension resulted from stressors. Since it involves deep breathing, it also lowers the heart rate and blood pressure risen as a result of stress.
