1.1.1 State the process for defining the Vision and Mission of the Department, and PEOs of the program

The main purpose of mission statement is to serve the department's goal. This is to make sure that the department remains on track and to ensure that the mission statement does not lose its touch.

Vision statements tend to be more related to strategic planning and lean more towards discussing where the department aims to be in the future.

The process which was used for defining the vision of the department are:

1. To know the goals of the department.
2. To consider the values of the department.
3. To build on a strong mission statement.
4. It must be a key towards the success of the department.
5. It should not be ambiguous in nature.
6. It must be futuristic in nature.
7. It must establish timeframes.

The Vision and Mission Statements were defined by involving the stakeholders of the department, considering the institutional Mission & Vision, the environmental scan and future of the country and global projections in the field of **Biotechnology Engineering** and allied fields. Following process was adopted in developing Departmental Mission and Vision statements:

Departmental Advisory Committee (DAC) conducts various analysis to ascertain its Strengths, Weaknesses, Opportunities and Threats. This was conducted covering all internal stakeholders including management and alumni. DAC conducted searched various internet (National and International) sites. DAC also studied the industrial policies of the state and the country.

DAC also considers the Institutional Mission & Vision and that of the affiliating university to ensure uniformity. DAC came up with questionnaires based on the above analysis and using the feedbacks from all the stake holders. Once all the information is collected and summarized, DAC members will have a healthy session to finalize the PEOs, Mission and Vision of the department.
